If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

## **DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/26/2009 has been entered. Upon entering the submission, claims 1-8 are currently pending in the instant application, and claims 6-8 remain withdrawn as non-elected subject matter.

### ***Response to RCE Submission***

#### **Claim rejection under 35 U.S.C. § 103a**

Applicants have amended claims 1-5 by further limiting "a composition" according to claim 1 to "a solid composition". In addition, Applicants argue that the previously cited the '730 patent by Suzuki and FDA Drug Application No. NDA #019437 merely disclose an oral or inject composition. Applicants' amendment and argument have been fully considered, and found persuasive. Furthermore, the instant Specification identifies the problem to be solved by the invention in paragraph [0004] and Fig. 1 of the Drawings. Due to the coexistence with a formulation additive under humidification/heating conditions in a solid state, a decomposition product is sometimes generated by a reaction as shown in FIG. 1:

Art Unit: 1626

(I)

**Decomposed Product** . This

decomposition pattern is specifically related to the instantly claimed composition according to claim 1. In addition, as demonstrated in paragraphs [0044]-[0053], the claimed limitation of at least one type of electrolyte of halide salts according to claim 1 plays a critical role in reducing decomposition of a compound of the formula (I) according to claim 1. Such a criticality is not taught or suggested in either the '730 patent nor the FDA Drug Application No. NDA #019437, or the combining teaching of the references. Based on STN search of a composition comprising a compound related to the formula (I), there is no prior art teaching of using electrolyte halide salts for stabilizing the claimed solid composition. Therefore, the rejection is hereby withdrawn.

**Claim rejection under Obviousness-type of Double Patenting**

The ODP rejection is also withdrawn based on the same analysis under 103(a) rejection.

***Status of the Claims***

Applicants' amendment overcomes the claim rejections. Search and examination are expanded to the previously withdrawn non-elected subject matter under Groups (I) and (III). The product claims and method of use claims are rejoined.

Art Unit: 1626

Because a claimed invention previously withdrawn from consideration under 37 CFR 1.142 has been rejoined, the restriction requirement among groups I-III as set forth in the Office action mailed on 02/12/2008 is hereby withdrawn. In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

***Examiner's amendment***

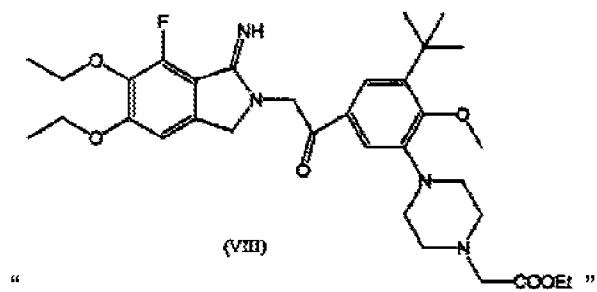

An examiner's amendment to the record with the authorization by Applicants' representative John W. Bailey dated 06/16/2009 appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Art Unit: 1626

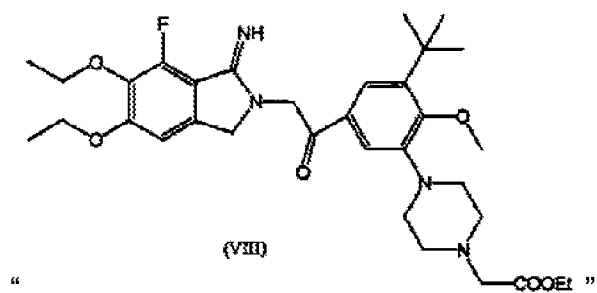

In claim 3, the second line from bottom, **insert** --and-- after

In claim 6, line 8, **delete** "[" before "wherein R<sup>1</sup> and R<sup>2</sup> are the same as or different from each other..";

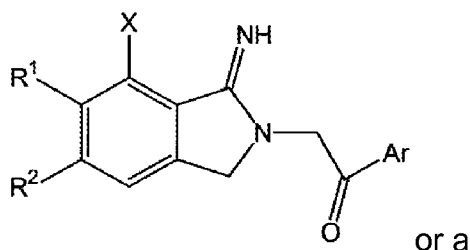

In claim 6, line 18, **delete** ".]" after "..R<sup>5</sup>, R<sup>6</sup> and R<sup>7</sup> represent hydrogen atoms or C1-4 alkyl groups".

In claim 7, the second line from bottom, **insert** --and-- after

### ***Reasons for Allowance***

The present inventions are drawn to a solid composition comprising a

pharmacologically acceptable salt thereof; and at least one type of electrolyte selected from the group consisting of halide salts of alkaline metal or alkaline earth metal and alkaline metal salts or alkaline earth metal salts of perchloric acid, and a method for stabilizing a benzamidine derivative of the formula (I).

The closest prior art of record is the '730 patent by Suzuki et al.

The '730 patent disclose a pharmaceutical composition comprising a compound of the formula (I). However, the '730 patent does not teach a solid composition further comprising an electrolyte of halide salts which is critical for reducing decomposition of the instantly claimed composition.

### ***Conclusions***

- Claims 1-8 are allowed.
